Nurturing School Leaders of Tomorrow

School leaders act as a catalyst of change. Their understanding and vision can ensure better future for children.

They not only foresee the future, but also ensure it. Nurturing of school leaders of tomorrow is thus a vital task.

Training of teachers for tackling different issues should be carried out at regular intervals.

Session Highlights:

- How important is teachers' training in today's world?
- What all should be included in the training?
- How can proper training make a difference in the human resources of a school?

12:30 PM - 1:30 PM

Role of Technology in Creating Excellence in School Education

Technology has changed the whole scenario in school education. Many schools have already started using technological advancements like smart boards for making the education entertaining and easy. Now, information is just a click away. Use of multimedia and open education resources help children in every possible way.

Session Highlights:

- Different kinds of technological advancements in the field of education.
- Role of technology in triggering excellence.
- Are schools equipped with the technological advancements?
